***(NOTE: If any of the health care providers listed above are employer, owned or controlled by the employer or the employer's carrier, it will be so designated by an asterisk next to the health care provider's name.)*

You must continue to visit one of these health care providers listed above, if you need treatment, for ninety (90) days from the date of your first visit.

After this ninety (90) day period, if you still need treatment and your employer has provided a list as set forth above, you may choose to go to another health care provider. You **MUST** notify your employer of this action within five (5) days of your visit to the health care providers of your choice.

Your bills will be considered IF: your health care provider files written reports on a form prescribed by the Department (these reports must be filed within ten (10) days of commencing treatment and at least once a month thereafter, as long as treatment continues).

If one of the health care providers listed above refers you to another health care provider, your employer or its insured will pay the bill for these services provided they are reasonable and necessary.

If you are faced with a medical emergency, you may secure assistance from a hospital or health care provider of your choice.
